## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on December 21, 2007 was filed after the mailing date of the non-final action on June 21, 2007. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Response to Amendment***

2. The indicated allowability of claims 14-16 is withdrawn in view of the newly discovered reference(s) to Mavinkurve. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 16 recites the limitation "said top sheet" and "said back sheet" in line 3. There is insufficient antecedent basis for this limitation in the claim. Specifically it is unclear which top sheet and back sheet is referred to, since claim 14 also recites "said top sheet" and "said back sheet" when referring to a side panel top sheet and side panel backsheet.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Mavinkurve (U.S. Patent No. 5,275,591).

With respect to **claim 14**: Mavinkurve teaches an absorbent pad 100 comprising: a base panel in the form of a central absorbent compartment and one or more side panels in the form of secondary flap compartments hingeably connected to said base panel along sealing line 10. Examiner's position is based upon the fact that the secondary flap compartments (side panels) are capable of being moved so as to overlie the base panel because said flaps are also capable of being wrapped around an undergarment. (Col. 8, lines 8-12) Therefore, the side panels have a full range of motion about the sealing line 10 that connects the side panels and base panel and the side panels are thus hingeably connected to the base panel. The one or more side panels each further comprises a top sheet 38, a bottom sheet 35, and one or more islands of absorbent tissue 30 disposed between said top sheet 38 and said bottom sheet 35 inasmuch as the absorbent 30 is isolated by sealing means 10, extending around the entire periphery of absorbent 30, from the base panel and the rest of the side panel. (Figs. 1,4, Col. 5, lines 1-4, 9-13; Col. 8, lines 8-12)

With respect to **claim 15**: The one or more side panels of Mavinkurve are foldable around the crotch portion of an undergarment. (Col. 8, lines 8-12) Thus, they are also considered herein to be foldable in a manner so as to allow said absorbent pad 100 to conform to a base and sidewalls of a similarly dimensioned package or container, such as a package for holding multiple absorbent pads.

With respect to **claim 16**: The base panel of Mavinkurve further comprises a top sheet in the form of the portion of the cover 38 that overlies the absorbent portion of the base panel, a bottom sheet in the form of the portion of backing 35 that underlies the absorbent portion of the base panel, and one island in the form of central absorbent core 34 disposed between said top sheet 38 and said bottom sheet 35. For examination purposes, it is interpreted herein that "said top sheet" and "said back sheet" is referring to the top sheet and back sheet of the base panel, rather than referring back to "said top sheet" and "said back sheet" recited in claim 14.
